About Version IT

Version IT is not a mere software training institute, a team of IT professionals developed it as the best knowledge centre for hundreds of career-building conscious young people. Our training academy is the best training institute in Hyderabad offering various software courses with aptly placement orientation. We proudly announce that we achieved 100% placements in every batch we have taken up in the past two decades. Version IT Academy's strength is our academic excellence with which we have been placed in the top position among the software training institute in Hyderabad.

VERSION IT

Module 1: Introduction & History of Snowflake

Snowflake History

- Cloud Data Platform
- Modern Data Architecture
- Value Of Cloud Data Platform
- One Platform, One Data Copy, Many Workload

Module 2: Snowflake editions and Self-Registration

- How To Choose Snowflake Editions
- How To Choose Cloud Providers & Editions
- How To Choose Compute & Storage Pricing
- Create User
- Validating Snowflake Instance

Module 3: Snowflake Architecture

- Snowflake Architecture
- 3 Layers Services (Storage, Compute & Service)
- Snowflake At A Glance
- Snowflake Capabilities & Unique Features
- Classic Web UI Layout
- Switching Role & Performance

Module 4: Snowflake WebUI

- Classic Web Ui Layout
- Switching Role & Performance
- Top Bar (Databases, Shares, Data Marketplace, Warehouse, History)
- SQL Worksheet & Object Navigations
- Query Profile & Other Features

VERSION IT

Module 5: SnowSight (Modern Web UI)

- Access SnowSight Via Preview App
- Legacy Web UI Vs SnowSight
- Worksheets & Data Profiling
- Dashboard & Sharing

Module 6: Snowflake Objects – Databases, Schema & Tables

- Snowflake Account & Container Hierarchy
- Account, Database & Schema Level Objects
- Display & Describe Objects
- Table Objects – Permanent, Transient, Temporary

Module 7: Snowflake Role Hierarchy

- What Are RBAC & DAC Concepts
- Default Roles In Snowflake
- Role Hierarchy & Its Power
- Grants Privileges
- SQL Commands For Roles
- Roles & Data Privacy
- Design & Implementation Roles In Snowflake

VERSION IT

Module 8: Snowflake Objects (What's New) & Snowflake Bulk/Batch Load

- File Formats Stage Objects
- Overview Of Data Loading
- Understand Stage Concept Using Internal Stage
- Understanding Stage Concept Using External Stage
- Integration Objects In External Stage
- Data Loading Feature
- Data Loading Considerations
- Bulk Load Using COPY Command

Module 9: Continuous Data Load- SnowPipe

- Pipe Objects In Snowpipe
- Overview Of Continues Data Loading
- Snowpipe Hands On
- Continuous Data Loading Considerations

Module 10: External Table & Data Load

- External Table Architecture In Snowflake
- SQL Construct + Options
- Query External Table
- External Table Auto Refresh
- External Table Information Schema

Module 11: Virtual Warehouse

- VWH Concept
- VWH Size & Price (Different Edition)
- VWH Auto Resume/Suspend Properties
- Multi Cluster Concept
- VWH Performance
- VWH Monitoring

VERSION IT

Module 12: Snowflake Monitoring & Billing

- Resource Monitoring
- Types Of Resource Monitor
- Resource Monitor Frequency
- Resource Monitor Notification
- RM Trigger & Query Suspension Action

Module 13: Snowflake Cluster Concept

- How Micro Partition Works In Snowflake
- Micro Partition & Columnar/Compressed Format
- What Is Clustering Key
- Auto Partition & Re-Clustering
- Clustering Depth & Clustering Overlap
- Cost Of Re-Clustering With Partition Key
- Query Performance Pruning & Query Profile

Module 14: Time travel

- Data Protection & Time Travel
- Time Travel & Snowflake Editions
- Time Travel & Fail Safe
- Time Travel For Permanent, Transient & Temporary Tables
- Account Level Configuration For Time Travel
- Extended SQL For Time Travel & Keywords
- Cost Of Time Travel
- Drop & Undrop Table, Schema & Table (Time Travel Feature)

Module 15: Data Masking Policy in Snowflake

Module 16: Views, Secure Views and Materialized Views

VERSION IT

Module 12: Snowflake Monitoring & Billing

- Resource Monitoring
- Types Of Resource Monitor
- Resource Monitor Frequency
- Resource Monitor Notification
- RM Trigger & Query Suspension Action

Module 13: Snowflake Cluster Concept

- How Micro Partition Works In Snowflake
- Micro Partition & Columnar/Compressed Format
- What Is Clustering Key
- Auto Partition & Re-Clustering
- Clustering Depth & Clustering Overlap
- Cost Of Re-Clustering With Partition Key
- Query Performance Pruning & Query Profile

Module 14: Time travel

- Data Protection & Time Travel
- Time Travel & Snowflake Editions
- Time Travel & Fail Safe
- Time Travel For Permanent, Transient & Temporary Tables
- Account Level Configuration For Time Travel
- Extended SQL For Time Travel & Keywords
- Cost Of Time Travel
- Drop & Undrop Table, Schema & Table (Time Travel Feature)

Module 15: Data Masking Policy in Snowflake

Module 16: Views, Secure Views and Materialized Views

VERSION IT

Module 17: Data Cloning Feature

- Zero Copy Cloning
- Objects That Can Be Cloned
- Cost Of Cloning
- DB & Schema Cloning
- Roles & Grants & Cloning

Module 18: Snowflake Stream Objects

- How Does Stream Work?
- Type Of Streams + SQL Construct – SCD Type 2 Implementation
- How To Consume Stream Data?
- Stream & External Table Cloning Stream
- Offset Concept + Data Retention Parameters
- Limitation Of Streams

Module 19: Dynamic tables in Snowflake and difference between Streams vs Dynamic tables

Module 20: Snowflake Task Objects

- How Does Task Object Work?
- Task SQL Constructs & Scheduling
- Stream & Task Together
- Task Tree
- Task Limitations

VERSION IT

Module 21: Snowflake Data Sharing - Reader's account

- How Sharing Works
- Types Of Sharing In Snowflake
- Cross Region & Cross Cloud Sharing
- Reader Account
- Snowflake Edition Sharing
- Storage & Compute Cost
- Limitation With Sharing

Module 22: ETL in Snowflake (Streams & Task together)

- How Task Works With Stream
- Understand System$stream_has_data
- CDC & Delta Processing
- Merge Statements
- End To End Data Flow

Module 23: Stored Procedure, UDF's & Views

- Stored Procedure Overview In Snowflake
- Stored Procedure Languages – SQL, JavaScript, Scala And Python
- Stored Procedures Vs UDFs SQL Injection
- Design Tips For Stored Procedure

VERSION IT

Module 24: Snowflake Information Schema

- Information Schema Views
- Information Schema Table Functions
- Account Usage Vs Information Schema

Module 25: Snowflake Connectors (Python)

- Python

Module 26: Reporting tools with Snowflake – Sample reports

- Build Web UI Using Streamlit

VERSION IT

DBT COURSE CONTENT

1. Overview

- DBT Introduction
- ETL Discussion

2. Features and Platforms

- Overview
- DBT Features
- DBT core and DBT Cloud

3. Environment setup and Installation

- Setting up the Environment
- Snowflake Account Creation
- DBT Installation Steps
- DBT model Creation and execution

4. Project Overview

- Analyses
- Models
- Macros
- Seeds
- Snapshots
- Tests
- Important setup files

5. Particles on Models
6. Particles on Materialization's
7. Particles on Seeds and Sources
8. Particles on Snapshots
9. Macro's
10. Custom Tests
11. Packages
12. Templates(Jinja)
13. Documentation walk through
14. Page and assets
15. Lineage Graph
16. Exposures and Hook
17. DBT Cloud Setup
18. Developer and Deployment Activities
19. Data Transformation using DBT
20. Data Quality Checks and Auditing.
