Foundation Training

Foundation week

Day-1

Understanding Enterprise IT

What is enterprise architecture (EA)?

- What is enterprise architecture?
- Why is EA important?
- What are the goals of enterprise architecture?
- What are the benefits of enterprise architecture?
- What are the six basic elements of enterprise architecture?
- The 4 domains of enterprise architecture
- What is an enterprise architecture pattern?

Day-1 and Day-2

Fundamentals of Computer Networking

- What is a Computer Network?

Computer Network Types

- LAN [Local Area Network}
- WLAN [Wireless local area network]
- CAN [Campus Area Network]
- MAN [Metropolitan Area Network]
- PAN [Personal Area Network]
- SAN [Storage Area Network]
- VPN [Virtual Private Network]
- WAN [Wide Area Network]
- SIP, H.323, VoIP

Networking terms and concepts

- IP address
- Nodes
- Routers
- Switches
- Ports
- Network cable types
- Computer Networks and the Internet
- HTTP (Hypertext Transfer Protocol)
- IP (Internet protocol or IP addresses)
- TCP (Transmission Control Protocol)
- UDP (User Datagram Protocol)
- FTP (File Transfer Protocol)
- How do they work?

Network Topology

- Bus Topology
- Ring Topology
- Star Topology
- Mesh Topology

Day-3

Programming Fundamentals – Python

- Python Programming Language – What is it?
- Work - Python can do?
- Anaconda Installation
- IDE ‘s for Python
- Various Important Python Libraries and Packages
- python Use Cases
- Python programming -10 basic programs in Python

Day – 4 (First Half)

Continuous Testing and CI Overview or DevOps

- What is DevOps?
- How DevOps work?
- Dev Ops Life Cycle
- DevOps Tools
- Benefits of Dev Ops
- DevOps Architecture
- DevOps Practices

Day - 4

Cloud Foundation

- What is Cloud?
- What is Cloud Computing?
- Basic Concepts
- Deployment Models
- Public Cloud
- Private Cloud
- Community Cloud
- Hybrid Cloud
- Service Models
- Infrastructure-as–a-Service (IaaS)
- Platform-as-a-Service (PaaS)
- Software-as-a-Service (SaaS)
- Benefits
- Risks related to Cloud Computing
- Characteristics of Cloud Computing

Day -5

RPA Basics

- Robotic Process Automation
- What is RPA?
- Automation v/s RPA
- Lifecycle of RPA
- RPA Tools
- Advantages of RPA
- Myths about RPA
- Usage of RPA
- Industries using RPA

Day - 5

ITIL and Project Management

- ITIL Basics,
- Principles of management and control Incident and Problem,
- IT Services and Asset management,
- Monitoring and event management
- Release and Deployment Engineering Discipline.
- Service Desk Support and Support Management
- SLA/SLI/SLO
